PROFESSIONAL SUMMARY

Computer Science and Artificial Intelligence graduate and Backend .NET Developer with hands-on academic, team, and freelance experience building secure, database-driven applications. Experienced in delivering end-to-end features across database design, REST APIs, authentication and authorization, role-based workflows, localization, automated business rules, testing, debugging, and Git-based collaboration. Proven ability to solve real client issues, work effectively in teams, and translate complex requirements into reliable, maintainable software.

EDUCATION & LANGUAGES

B.Sc. in Computer Science and Artificial Intelligence | Assiut National University | GPA: 3.16 | Graduated 2026

Languages: Arabic (Native) | English (Good working proficiency) | Military Status: Exempt

EXPERIENCE & LEADERSHIP

Freelance ASP.NET Core Developer - Khamsat | July 2026-Present

- Completed a paid ASP.NET Core troubleshooting order through Khamsat, diagnosing and resolving an application issue and earning a 5-star client rating.

President - Student Union, Assiut National University | 2022-2026

- Led university-wide student teams and was recognized for leadership achievements. Previously served as Faculty Student Union President (2022-2023), leading the union recognized as the Best Faculty Student Union in Assiut.

PROJECTS

University Admission System | Graduation Project (Team of 4) | ASP.NET Core MVC | C# | EF Core | SQL Server | June 2026

GitHub: github.com/3ab3al11/University-Admission-System

- Built a secure, bilingual admission platform supporting Excel imports, student verification, preference submission, and deterministic college allocation.
- Implemented role-based access, eligibility and capacity rules, transactional batch processing for up to 5,000 records, and 129 xUnit tests.

Clinic Flow | Team Project (2 Developers) | ASP.NET Core MVC | C# | EF Core | SQLite | May 2025

GitHub: github.com/3ab3al11/Clinic_Flow

- Developed a multi-role clinic management system with six appointment states covering booking, consultations, and patient workflows.
- Enforced patient-data authorization, server-side validation, appointment-state transitions, and double-booking prevention.

Football Field Booking System | Team Project (2 Developers) | ASP.NET Core MVC | C# | EF Core | SQLite | Jan 2025

GitHub: github.com/3ab3al11/Football-Field-Booking-System

- Built a two-role booking system with availability checks, 10-minute reservation holds, simulated payments, refunds, and reminders.
- Implemented conflict detection, booking validation, status transitions, and CSRF protection across write operations.

TECHNICAL SKILLS

Backend: C#, .NET, ASP.NET Core MVC, Web API, REST APIs, DTOs, Middleware, Global Exception Handling, Validation, Logging, LINQ, Async/Await.

Databases: SQL Server, SQLite, EF Core, EF Core Migrations, Fluent API, Dapper, ADO.NET, T-SQL, Database Design.

SQL: Joins, Stored Procedures, Transactions, Indexes.

Architecture: N-Tier Architecture, MVC Pattern, Separation of Concerns (SoC), Inversion of Control (IoC), Dependency Injection.

Design Principles & Patterns: OOP, SOLID Principles, Repository Design Pattern, Generic Repository, Unit of Work, Singleton Design Pattern, Observer Pattern.

Security & Testing: ASP.NET Core Identity, JWT, Role-Based Authorization, CORS, xUnit, Swagger, Postman.

Frontend & Tools: HTML5, CSS Fundamentals, Bootstrap, AJAX, Git, GitHub.

AI-Assisted Development: ChatGPT, Cursor, and Claude for research, debugging, code review, testing, and documentation; outputs independently reviewed and validated.

COURSES & TRAINING

Training: Back-End .NET - Eraa Soft (2025) | PHP & WordPress - ITI (2024) | Front-End - ITI (2023)
